

Enhancing Linemen Skills on Boom Truck Operation

Written by Michael B. Hepiga

Through the manifestation of Innovation, Responsibility and Service Excellence, Cotabato Light - Engineering Department sent four linemen in Davao Light Technical Training Center in Maa, Davao City to undergo an orientation and evaluation of digger and bucket truck operations.

This is to add up authorized operators in using digger truck and bucket truck. Strengthening

workforce through skilled line workers in Transmission and Distribution Section. The three day orientation was conducted last October 8 – 10, 2014, headed by Sir Edgar Orilla, LSD – Supervisor of Davao Light *“We can only made our skills perfect in boom truck operations through constant practice and always put in mind to priority your safety”* he added.

Teamwork and commitment to work are important key factor to be used when doing this kind of risky task. The orientation and evaluation can increase the efficiency and flexibility to work as a lineman in order to meet costumers expectation, satisfaction and demand.

The four linemen are Adriano Ragandan, Albert Pacana, Jeovani Tuquib and Michael Hepiga all are coming from Transmission and Distribution section headed by Bernabe Parcasio.
